Technical Business Analysis | AI Operations | Technical Implementation

Professional Summary

Computer science graduate with experience in enterprise SaaS, AI model evaluation, and operations management. Brings an analytical approach to evaluating AI outputs, improving workflows, coordinating software releases, and supporting customer migrations. Communicates across technical and business teams to translate complex work into practical operational results.

Core Skills

AI and Quality: AI model evaluation, prompt development, scoring rubrics, factual accuracy and instruction adherence, multimodal evaluation, data annotation

Analysis and Delivery: Workflow optimization, testing, release coordination, customer migrations, Agile planning, backlog refinement, stakeholder communication, staff training

Technical Tools: SQL, Python, REST APIs, Java, JavaScript, TypeScript, Angular, Spring Boot, Git, GitHub, Jira, TeamCity

Professional Experience

AI Model Evaluation Specialist (Contract)

Handshake AI | Remote | Nov 2025 - Present

- Design real-world evaluation tasks, structured prompts, and scoring rubrics to assess AI model performance across business and operational scenarios.
- Evaluate reasoning, factual accuracy, instruction adherence, and task completion to improve AI reliability and usability.
- Perform text, image, video, and multimodal evaluations; capture and annotate structured datasets for AI training.

Software Developer - Full Stack (Enterprise SaaS)

ECG, Inc. | Remote | May 2023 - Jun 2025

- Owned development, testing, and release coordination for two major production versions of an enterprise SaaS platform supporting thousands of users.
- Implemented bulk provisioning and automation workflows to reduce manual effort and operational risk in enterprise VoIP administration.
- Supported customer migrations with compatibility updates and transition-safe workflows designed to minimize downtime.
- Built administrative interfaces and REST APIs; collaborated on sprint planning, backlog refinement, code reviews, and stakeholder communication.

Assistant Manager & Operations Coordinator

Mom and Dad’s Italian Restaurant | Valdosta, GA | Aug 2019 - Aug 2021

- Coordinated daily operations serving 250+ customers per service, assigned sections for 10+ staff, and resolved customer escalations.
- Implemented To-Go service systems to improve order accuracy and efficiency; trained and onboarded 10+ employees.
- Tracked beverage inventory and prepared nightly revenue reports, staff assignments, and financial summaries for ownership.

Education

Bachelor of Science in Computer Science

Southern New Hampshire University | December 2025
